

Community College Engineering Scholarships

2025 – 2026 ASHRAE Southern California Chapter Student Scholarships will be granted to eligible and deserving 2-year community college students with a serious goal of entering the field of Heating, Ventilation, Air Conditioning & Refrigeration (HVAC&R) Engineering after graduation. The scholarship grant amounts are generally between \$1000 and \$3000, depending on the candidate's qualifications.

Requirements for ASHRAE Engineering Scholarships:

- Must have a demonstrated interest in HVAC and/or refrigeration through academic classes, extracurricular activities, and/or work experience.
- Cumulative GPA of 2.0 or above.
- Must have completed at least one technical course in engineering or physical science.
- May be a full-time or part-time student.

For consideration by the Chapter, please submit the following documents listed below:

- Personal contact information – mailing address, phone, email address.
- Resume of academic and personal achievements, work experience and interests.
- Complete community college transcript with courses taken and GPA - photocopy is acceptable.
- One letter of recommendation from an HVAC instructor or an ASHRAE Club faculty advisor.
- Short personal statement (one page or less) explaining why HVAC&R is your chosen career path and how this scholarship will help you achieve your goals.

Submit all documentation in electronic form (PDF preferred) to the Scholarship Selection Committee member listed below **no later than March 31, 2025**.
